

NEW SIGNS FOR TORTOISEVILLE!

photos: Doug Jensen

MANY YEARS AGO, Sandy Juba noticed the gopher tortoises and saw the need to post a sign so others would respect these threatened and protected animals. A small sign was built by the Sawdust Club and placed along the habitat swale on the dog path. Now years later, volunteers removed the invasive plants and replaced them with forage plants for the tortoises. New signs, again built by Sawdust Club members paid through community donations to TGO NatureScape, are now in place.

Thanks to CSA for their help in the cleanup of the habitat and the sign installation!
